Projects

Cyclistic Bike-Share Analysis | Data Analytics Portfolio Project
SQL, Google BigQuery, Google Sheets, Tableau | October 2026

- Cleaned and analyzed 1,430,076 bike-share trip records using SQL and Google BigQuery.
- Compared casual riders and annual members across ride duration, weekday activity, monthly trends, and hourly patterns.
- Built an interactive Tableau dashboard with four visualizations and developed data-driven marketing recommendations.
- Published project documentation and SQL queries on GitHub.

Real Estate Spreadsheet Analysis | Academic Project
Microsoft Excel | Salem State University

- Developed and organized an Excel spreadsheet for a real estate coursework project, performing calculations to complete the assigned analysis.
- Designed a visually appealing, well-formatted spreadsheet using clear layouts and organized data to make calculations and results easy to understand.

Equity Investment Analysis & Stock Pitch | Academic Project
Salem State University

- Analyzed a publicly traded company's financial statements, financial ratios, historical performance, and competitive positioning to evaluate its investment potential.
- Evaluated the company's growth opportunities, financial risks, and overall investment potential to support an investment recommendation.
- Prepared a professional, visually engaging investment presentation to communicate findings and recommendations to an investor-oriented audience.

Education

BBA in Business Administration - Finance May 2026

Salem State University, Salem, MA
